WORLD RECORD TO TAKE PLACE AT BRANSON AIRPORT

BRANSON, MISSOURI – Michael Combs has received permission from The National Aeronautical Association to conduct an officially sanctioned World Record Flight granted to him and his REMOS GX Light Sport Aircraft and is scheduled to arrive at the Branson JetCenter the morning of July 9, 2011 at approximately 11:00 AM CST.

According to the document, the take-off point will be Ft Worth, TX and touchdown will be in Branson, MO. It is a flight that when completed will award Combs and his aircraft named “Hope One” a place in aviation history.

Combs has successfully flown his aircraft into 49 states and covered more than 27,300 miles. Branson will become the 170th stop on a journey that is slated to end in Honolulu, HI as soon as passage across the Pacific can be arranged or sponsored.

“This is a fantastic day,” said Combs from his Lake Dallas office. “One of our goals was to establish a new world record in the REMOS and demonstrate that anyone can set a World Record if you just stick with the process. This is actually one of three sanctioned flights that we are planning to set in this aircraft.”

Branson was first selected in February of 2010 to be a point of landing for his World Record attempt. “I actually chose Branson (KBBG) a long time before I ever started flying,” said Combs. “It is a fantastic place with amazing people. It just seemed like a perfect fit to bring an aviation event to this area and to highlight Branson to the world for something other than fine music.”

Combs and his wife Michele made another historical flight to Branson in May of 2010, when he crossed the country in 40 days, covering 19,000 miles in “Hope One.”

Completed in just 22 months, the Branson Airport opened its doors in May 2009 as the first privately developed and operated commercial service airport in the country. For information visit www.FlyBranson.com or call 1-888-FLY-BGK1 (1-888-359-2541) or 417-334-8857.
